Hello All,

It has been a struggle, but "Woody" is installed using the bf24 option. I have Xinerama working, the scanner scans, the computer can communicate with the digital camera.

But I'm hitting a wall with the cd burning.

I get to the part in the Howto where you test for the modules:

ide-cd
ide-scsi
loop
scsi_mod
sr_mod
iso9660

and my good computer says they are nowhere to be found.

So where do I get them?

Thanks,
Conrad
