Hello

I have details of a second try at getting hardware rendering for a voodoo v card here -> <http://www.skink.net/~davis/docs>

My basic problem is that in the past, I had hardware rendering enabled. After a rebuild of the computer and reinstall I can no longer get dri to work. My X log says I have dri enabled. My glxinfo output says I don't have hardware rendering. I'm at a loss. Please help.
