I don't know about RealONE player like Paul Johnson said, but
Realplayer8 is available at

<http://forms.real.com/real/player/unix/unix.html>

You might have to convert the rpm into a deb with "alien". I've also seen people posting some unofficial debian repositories with realplayer so that you can get it with apt-get. I don't remember what they are right now.. maybe someone else can clarify(Its something like marillat.free.fr or something....)

I think with some more digging you *might* be able to find RealONE for linux (AFAIK, it's in that alpha state right now....)

Good Luck,
