After upgrading my Libranet (Sarge-based) system, I now end up with the following messages after doing anything apt-get based (including Synaptic):

W: No priority (or zero) specified for pin
W: No priority (or zero) specified for pin

However the apt-get commands and apps work. How do I solve the problem/warnings?

Arlen Carlson <arlen@carlsonotech.net>

I just thought of something funny...your mother.
