ObFormatting: please set your mailer to send plain text only, and wrap lines at 72 characters.

> *I have however one question. I have troubles with my network card. I can get it up and running ok, using the tulip drivers from scyld.org. I can configure it, add the default routes etc etc. But I have to do this everytime I boot the system, because I don't know where to add the configuration so it is set up right when it boots.*
