hi all, this is my first question :)

please help me answering this question:

which packages did I install with apt-get on the 1st of february?

I've tried:

`dpkg -l`

`dokg --list`

`dpkg --get-selections`

.. but these commands don't tell me the installation date of each package!

is there a way to see a list of installed packages, with the INSTALLATION DATE?

I've also posted in a lot of forum but nobody was able to help me!

bye all and thank you!
