Hello --

Thanks for writing in to the Math Forum! This automatic response confirms that we've received your message.

At the bottom of this note, please find a few questions that people commonly send to the Forum, along with our standard responses. We sincerely hope that you find the answer to your question among those we've listed.

If you have a question or concern that this list does not address sufficiently, a Forum staff member will respond to your message within the next couple of days.

Thank you,

The Math Forum Staff

<http://mathforum.org/>

Q: WHERE CAN I GET HELP WITH A MATH QUESTION?

A: Have you heard about Ask Dr. Math, the Forum's question and answer service for math students and their teachers? We have a searchable archive of questions and answers, plus a form for submitting questions, at:

<http://mathforum.org/dr.math/>

If you submit a question to the doctors, give as much information as possible about the trouble you're having: show the work you've already done, and ask specific questions about whatever it is you don't understand.

Q: WHERE CAN I FIND A MATH FORMULA OR DEFINITION?

A: Try the Dr. Math FAQ for formulas:

<http://mathforum.org/dr.math/faq/faq.formulas.html>

... or Eric Weisstein's World of Mathematics, formerly Eric's Treasure Trove of Mathematics:

<http://mathworld.wolfram.com/>

Q: WHERE CAN I GET ADVICE ON <math or math ed topic> ?

A: Have you heard about the Forum's Teacher2Teacher service? Our panel of teaching professionals is available to answer your questions about teaching mathematics or how your children are learning math:

<http://mathforum.org/t2t/>

To reach a broad audience, post a message to a relevant mailing list or newsgroup. Here's a list of discussions hosted and/or recommended by the Forum:

<http://mathforum.org/discussions/>

Q: WHERE CAN I FIND WEB PAGES ON <math or math ed topic> ?

A: Visit the Internet Math Library, an annotated catalog of mathematics and mathematics education web sites. The Library features a description of each entry, hierarchical categories for browsing, a searcher on each browse page, and selected sites for each category's starting points:

<http://mathforum.org/library/>

Alternately, conducting a search remains a good way to find specific resources on the Internet. We encourage you to go to our main search engine and enter keywords pertaining to the topic you want to find:

<http://mathforum.org/grepform.html>

Q: WILL YOU LIST MY URL ON YOUR SITE?

A: You're quite welcome to suggest URLs for inclusion in our Math Library, as long as they relate to math or math education. Please fill out this online form:

<http://mathforum.org/library/add.html>

Re: fake

Q: MAY I LINK TO YOUR SITE?

A: Sure – go right ahead! Please give us proper attribution and state clearly that this is a Forum resource, and not something of your own creation. If you'd like to have us make a reciprocal link, fill out the web form mentioned above.

Q: MAY I HAVE PERMISSION TO REPRODUCE YOUR CONTENT?

A: You may reproduce a Math Forum web page for private or classroom use. Please give us proper attribution and state clearly that this is a Math Forum resource, and not something of your own creation. You may not publish the reproduction on a public website or for commercial purposes without our explicit permission.

For commercial reproductions, please complete and submit our permission form:

<http://mathforum.org/help/permission.html>

To learn more about our terms of use, please read

<http://mathforum.org/announce/terms.html>
