hello :

Working with Sarge And Sid all works fine but

When I switch to the console ctrl-alt-f1 and go back to Xwindow shows up the Xwindow X pointer on the center of the screen but the mouse pointer works moving normally

as a result of this

I have 1 mouse pointer working normally
and 1 X mouse pointer at the center of the screen without motion

any clue ?

PD this happens with Sarge and SID too

it's on a IBM T23 laptop with video is a S3 inc SuperSavage

Thank you

Leonel Nunez
