Hi all,

after the last apt-get update && apt-get upgrade I can't configure my kernel any more:

```
---
root@stefan:/usr/src/kernel-source-2.6.8# make gconfig
scripts/kconfig/gconf arch/i386/Kconfig
(gconf:6136): Gtk-CRITICAL **: file gtklabel.c: line 2792
(gtk_label_set_use_underline): assertion `GTK_IS_LABEL (label)' failed

```

Unfortunately I can't tell which packet (update) causes the problem.
