Hey there.

KDE 3.3.2, Debian Sarge, 2.6.8-2-386

I have a problem. I recently changed my default hmtl viewer from within control centre to Firefox. Now, whenever I click on a link in Thunderbird, Konqueror opens, does not open the page, and Firefox also loads and displays the page I want. Is there anyway to modify this behaviour so that only Firefox loads?

Rhys
