Hello All:

I have installed a Qmail-Toaster Mail Server in ma office, I have recieved a new machine for Mail Server " with all different Specs, as compaire to current Mail Server Machine". I want to migrate all accounts and mails to new machine. :(

I cant find any Backup and Restore Procedure for it. please help me out, that how can I replace old machine with new one. (if any howto is available)

Step-wise procedure is highly appriciated :)

TIA.

bye.
