To: [debian-user@lists.debian.org](mailto:debian-user@lists.debian.org)

Hello,

I am on a network configured with local IPs, 192.168.1.2 and so on.

Strange thing is that ping google.com, kmail and konqueror work but mozilla and apt don't.

```
apt-get update
```

```
0% [connection to ftp.fr.debian.org (1.0.0.0)]
```

and then waits indefinitely.

Mozilla starts, then displays: "Connection to google.com" then waits until it times out.

What could be the cause?

Thank you.

Alex.
