

Debian-User: "Knowledge Base" software?

"Knowledge Base" software?

To: Debian User List <debian-user@lists.debian.org>

It occurs to me that we could use, at work, some sort of web based "knowledge base" software.

By this I mean a search-able way of storing tidbits of information that various people have gathered over the years about how our systems work so that others can benefit from the combined expertise of all of us.

I was wondering what FOSS packages might fit into such a system?
