I use procmail along with fetchmail/mutt/exim. Procmail will sort all your mail into mailboxes which is great for mailinglists and it also can do filtering if you need it.

Here are some tutorials, I think I used the first one to set up my mail but its been so long now I cant remember :)

<http://linuxbasics.org/linuxbasics/UsingMuttToAccessYourISPEmailAccount>

<http://cerium.raunvis.hi.is/~tpr/linux/debian/mail.html>

<http://www.qsl.net/n0nb/linux/debiantips.html#exim>

good luck!
