> > 2) I still cant apt-get update (the same problem i.e. (1.0.0.0) hang persists.) >... if I remember rightly, you recently posted your dmesg output >which showed your single ethernet card being recognized twice - as >eth0 (associated with the via Rhine driver) and eth1 (associated >with the 8139too driver). Since 8139too seems to be the correct >driver, but ifconfig shows eth0, could the problems stem from your >having the wrong driver from the card? But in the process of upgrading to bf24 I reinstalled the system with ext3 fs and now am able to use the VESA driver. Still no i830 modules as yet. Now the contents of dmesg is -----
shatam@ginie:~\$ dmesg Linux version 2.4.18-bf2.4 (root@zombie) (gcc version 2.95.4 20011002 (Debian prerelease)) #1 Son Apr 14 09:53:28 CEST 2002 BIOS-provided physical RAM map: <snip> 8139cp 10/100 PCI Ethernet driver v0.0.6 (Nov 19, 2001) 8139cp: pci dev 01:02.0 (id 10ec:8139 rev 10) is not an 8139C+ compatible chip 8139cp: Try the "8139too" driver instead. 8139too Fast Ethernet driver 0.9.24 eth0: RealTek RTL8139 Fast Ethernet at 0xd081ac00, 00:08:a1:32:e1:7e, IRQ 18 eth0: Identified 8139 chip type 'RTL-8139C' <snip> eth0: Setting 100mbps full-duplex based on auto-negotiated partner ability 41e1. Intel 810 + AC97 Audio, version 0.21, 10:28:09 Apr 14 2002 ----- the sources.list is deb
<http://security.debian.org/stable/updates> main deb <http://http.us.debian.org/debian/stable> main contrib non-free ----- the apt-get update still hangs as ginie:/home/shatam# apt-get update 0%
[Connecting to security.debian.org (1.0.0.0)] any clues Plz help Shatam
