To: debian-isp@lists.debian.org

Hi,

I have configured my external modem (it has been detected by debian) according to this article

<http://www.aboutdebian.com/modems.htm>

I don't need any user name and password to connect to my ISP. I am hearing the dial tone after giving the command

pon

but not able to connect internet. What could be the problem. Please help me out.

Regards

Ali
