Hello,

I just setup my wifi with my laptop in my house... I have the Linksys Wireless-B 2.4ghz 802.11b Model WPC11-V4 I setup the wireless with the ndiswrappers... is working fine, but when I restart de computer.... I have to setup everything again....even when I wrote ndiswrapper in the /etc/modules.... and when I have the wireless and the wire conection both at the same time gets kind of slow.... do you how I can fix this problems?? thanks...
bye

Martin Kenneth Lopez
