Hi!

When I select that crossfade output plugin, everytime I try to play music, I get the "Can not open sound device" popup message. The crossfade plugin doesn't work with builtin oss, nor alsa-output nor the oss-output plugins. But if I don't use the crossfade plugin, I can use the ALSA and the OSS output plugins too, both of them are working.

Anyone has the same problem? How can I fix this?

Thanks!

Daniel
