Are you sure it's in ruby-mode when you're editing?

I'm no expert but I've got this in my .emacs which look like it might help you:

```
;;; FONT-LOCK COLOURS
(cond ((fboundp 'global-font-lock-mode)
      ;; TURN ON FONT-LOCK IN ALL MODES THAT SUPPORT IT
```

Debian-User: Re: emacs syntax colorizing only comments and strings in ruby-mode

```
(global-font-lock-mode t)
;; MAXIMUM COLORS
(setq font-lock-maximum-decoration t))
```
