Hello,

I've a sound problem with my TEKRA 8100 of toshiba laptop.

Here is a frequent message displayed when i was trying to solve the problem:

```
"Error while initializing the sound driver:  
device /dev/dsp can't be opened (No such device)  
The sound server will continue, using the null output  
device."
```

Here is my sound card name = Audio native DS1x Yamaha

Please thank for helping me.
