hello, here again.

i'm having a problem, in the authentication using courier-authdaemon for smtp, for imap and pop3 works fine.

when i tried to send an email i have this error in the syslog

```
Aug 30 16:54:19 ns1 postfix/smtpd[2767]: warning:
unknown[192.168.100.11]: SASL PLAIN authentication failed
Aug 30 16:54:19 ns1 postfix/smtpd[2767]: warning: SASL authentication
failure: cannot connect to saslauthd server: No such file or directory
Aug 30 16:54:19 ns1 postfix/smtpd[2767]: warning:
unknown[192.168.100.11]: SASL LOGIN authentication failed
```

i'm using sarge, postfix is in a jail.

the smtp.conf is

pwcheck_method: saslauthd auxprop

mech_list: login plain

auxprop_plugin: sql

sql_engine: mysql

sql_hostnames: 127.0.0.1

sql_user: postfix

sql_database: postfix

sql_passwd: xxx

sql_select: select password from mailbox where username = '%u@%r'

any idea?

thanks in advance

juan manuel
