Hi

I want to rip my audio cd's and have the files renamed to the name of the music title. I have heard about 'abcde' and have used 'jack' long ago (but forgotten the details). I didn't know which one to take, so I wanted to try both, but couldn't manage to run either of them.

I'm not really clear, how it is supposed to work. Do I have to run these programs as root? (wouldn't like the idea...).

Robert
