-

I'm running 2.6.15-1-686 with testing/some experimental and getting KDE opening errors with Openoffice(SIG 11 and sometimes 4). Using OO v1.1 but v2.0 is available. So tried to upgrade OO to 2.0 but Apt refused to do so. Aptitude doesn't show anything but Wajig shows unmet dependency for kdelibs-data. apt-get -f install doesn't fix. Also Aptitude wants to uninstall a bunch which I don't want to do especially kde-core. Sure need some expert help on this. All the output for everything I tried is shown below:

```
ChatagnierL-Home:/temp# aptitude install
openoffice.org

Building Dependency Tree... Done
openoffice.org is already the newest version.
You might want to run `apt-get -f install' to correct
these:
The following packages have unmet dependencies:
kdelibs: Depends: kdelibs-data (>= 4:3.3.2-6.4) but
4:3.3.2-6.3 is to be installed
E: Unmet dependencies. Try 'apt-get -f install' with
no packages (or specify a solution).
ChatagnierL-Home:/temp#
```

```
ChatagnierL-Home:/temp# apt-get -f install
Reading Package Lists... Done
Building Dependency Tree... Done
Correcting dependencies... Done
The following extra packages will be installed:
kdelibs-data
The following packages will be upgraded:
kdelibs-data
1 upgraded, 0 newly installed, 0 to remove and 54 not
upgraded.
1 not fully installed or removed.
Need to get 0B/7094kB of archives.
