

bash scripts: how to determine directory of 'source'd file

Source: <http://linux.derkeiler.com/Mailing-Lists/Debian/2006-01/msg03613.html>

-

Presuming I have a file setEnvVars.sh that I wish to source,
. path/setEnvVars.sh
How do I, within the script, determine the actual directory within which
the setEnvVars.sh file sits? The sourcing seems to disallow me access to
\$0 etc

thanks, M
