Hi,

I'm looking for LaTeX or alsaplayer.
Anyone have any idea which Debian 3.1r1 CD
these packages might be on?

Loki

Thanks to all who replied.

One other question: is there an up-to-date
Printing How-To somewhere? I need to get my
HP non-postscript inkjet working.

Short answer:
Install CUPS and its friends:
it should be Ok.

hth,
Jerome

PS:
see www.miktex.org to compose [La]TeX document

Re: How to find software?

on Window\$ computer.

You'll need xprint as well to print from your browser.
Also, this site...

<http://www.linuxprinting.org/>

Regards,
