Maybe this will help?

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=367593>

I changed my .fonts.conf to the one in the bug report, and that's much nicer.
Many thanks for this pointer !

I've tried so many things over the past couple of weeks that I have things so screwed up that it doesn't even seem to respond to changes anymore. Joy, joy, joy!

Hopefully someone will fix this so that my fonts can look better than those on the Winbox at work again...
