- 

Hi All,

I have a pc with 3x40GB IDE drives.

I have 2 RAID 5 devices setup-

```
/dev/md0 = 3 x 38GB as /  
/dev/md1 = 3 x 2GB as SWAP
```

Debian base installs OK but when I get to the Grub installation I get a "Fatal Error" message.

I am telling Grub to install on /dev/md0 but it won't install.

Any tips would be appreciated.

Regards,

Chris
