Hello Marcelo.

Marcelo Chiapparini, 31.12.2006 16:27:

thank you for your answer! My sources.list file has the Marillat repository:

deb <http://www.debian-multimedia.org/> sarge main

Now the output from aptitude:

Did you run aptitude update before this?

Regards, Mathias

Mathias,

I run update periodically. However, I ran aptitude update again now, and I got the same result as before: Couldn't find any package whose name or description matched "gststreamer0.8-lame"...

are you running sarge?

regards,

Marcelo
