Jerome BENOIT writes:

Hello List,

I have just tried Multi-Gnome-Terminal on my new x86\_64 box:

it appears the terminal is filled with arbitrary characters

[ bug #345504 <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=345504>

I can reproduce this with

Package: multi-gnome-terminal

Version: 1.6.2-13

Architecture: amd64 (x86\_64)

Locale: LANG=en\_US.ISO-8859-15, LC\_CTYPE=en\_US.ISO-8859-15 (charmap=ISO-8859-15)

Is there any good alternative, patches or workarounds ?

Maybe set the bug severity to critical? The program is unusable and not suitable for release.
