Every day I get an email to my root account with the following error:

```
/etc/cron.daily/apt-cacher:  
flock() on closed filehandle $lck at  
/usr/share/apt-cacher/apt-cacher-cleanup.pl line 121.  
flock() on closed filehandle $lck at  
/usr/share/apt-cacher/apt-cacher-cleanup.pl line 123.
```

Not really sure (a) what this means and (b) how to rectify the
problem.

maybe you have an instance of apt running somewhere that has things
locked up?

just a thought.

A
