Hello Marcelo.

Marcelo Chiapparini,  
31.12.2006 16:27:

thank you  
for your  
answer! My  
sources.list  
file has the  
Marillat  
repository:

deb  
<http://www.debian-multimedia.org/>  
sarge main

Now the  
output from  
aptitude:

Did you run aptitude  
update before this?

Regards, Mathias

Re: soundjuicer and mp3

Mathias,

I run update periodically. However, I ran aptitude update again now, and I got the same result as before: Couldn't find any package whose name or description matched "gstreamer0.8-lame"...

are you running sarge?

regards,

Marcelo

Out of interest I've just added Marillats repo to my Etch install. I don't use aptitude, but apt-get, and synaptic. There is a gstreamer-lame there, but it is version gstreamer0.10-lame, which is the same version as all the other gstreamer stuff on the list.

Nigel.

Apologies for replying to myself, but further down synaptics list is gstreamer0.8-lame.

I know I'm not in Sarge at the moment, so can't check out if it's available there. It may be worth checking that you have no typo in /etc/apt/sources.list for the Marillat repo, and that the key is installed ok.

Hello Nigel, thank you for reply. No, I have no typos in /etc/apt/sources.list for the Marillat repo... I don't know about the key... by the way, does exist a list of all the software in Marillat repository?

Thanks!

Marcelo

I've just emailed Christian Marillat to see if there is a list of available packages. I know for third party repo's for Fedora core, there is normally a list of available packages, and you can download individual packages with no problem. Of course there may be dependency issues that, if you downloaded the packages with apt-get, dependencies would be resolved by apt-get, but might

Re: soundjuicer and mp3

Re: soundjuicer and mp3

find yourself in dependency hell otherwise.

Just wait and see if I get a reply from him.

Nigel.
