Hi all

Where does Kmail locate its mail directories? It is evidently in a different place than where I am used to it being.

Thanks

/A

You should find them in /home/user/Mail

Nigel.

Thanks Nigel

That is the place I first went to look, because that is where I'd expect them to be. Only thing I have in /home/user/Mail/inbox is "1". I was wondering if they were kept in /opt or something, because they don't seem to be in .kde or any other (obvious) dot directories.

Cheers

/A

The only other suggestion I had from the KDE list when I wanted to move mail, was to look in /home/user.kde/share/apps/kmail/mail . That's a bit hit and miss, but you might find it there.

Nigel.
