Now as far as video, who cares about that... servers don't need GUI stuff.

Tell that to our admins who run redhat and suse. Want to disable these guys? Remove some X libraries. (The one guy who uses CLI uses telnet)

Yes they really have X on ALL of the servers.

What moron at that company did they talk to to get their jobs, are they on good terms with said moron, and do they cover medical/dental and transit fare?

Larry Ellison.

If you want to install Oracle on Linux (and *lots* of companies do, so don't bleat about not infecting your system with closed-source), you need X.
