restarting the xserver. Due to my lack of experience with xorg I need a little help. Thanks!!!

The only general option I recall (though I don't know if it applies to switching to console) has something to do with using framebuffer when changing resolutions. Run `dpkg-reconfigure xorg.conf` to set this.

Otherwise more info is necessary (video card, xorg.conf, ...) to even try diagnosing ...

Regards,  
Andrei
