Dear Debian Group

My English is so bad, so i want to install kde-i18n-zhtw language package but, i use "apt-get install kde-i18n-zhtw" command, that say "No found"

i also use the command "apt-get search kde-i18n-zhtw", that say "E:Invaild operation search"

I'm using Debian 4.0-KDE

Pls help

Thanks

Wayne

Hi Wayne. Have you remembered to su to root before running the apt-get install command? I've just looked in synaptic on Etch, and the package is there, but as I do not speak or read chinese there is no point in installing it.

It is shown as kde-i18n-zhtw (latest version) 4:3.5.5-1

Nigel.
