dear...,

How do i install debian on a system with a adaptec 1420sa controller and a maxtor 160 gig sta drive.

The install programm freezez after a minute or so

Thanks

guido

We'll need more info before being able to answer you.

1. What is your motherboard?
2. What is the CPU (AMD/Intel/???, 64 bit, 32 bit...)?
3. How much memory?
4. Which Debian (etch/stable, testing, old stable...)?
5. Anything else you think we need to know.
