Hi,

Here's the deal:

I'm having some serious problems with the upgrade. I've followed the instructions found here <http://www.debian.org/releases/stable/amd64/release-notes> and I have a "full desktop system".
That means that after doing a minimal install (pointing sources.list to etch and doing

Whoa! I thought you said you were UPGRADING from sarge to etch? Or did you do a clean install?

If someone could also tell me how to read what comes after some dialogs (questions y/n) (slow it down) it would be greatly appreciated, because I can't tee it to a file, since the dialog is in the middle. I can't use less/more for the same reason.

Check this howto, it's step by step:

HOWTO: Debian Installation Business Card Netinstaller
<http://forums.debian.net/viewtopic.php?t=5484>

suerte,
