Re: [OT] Vituperation(s) [WAS] Re: Etch + USB Modem -- Supported?

wrote:  
[snip]

not  
have  
Linux  
drivers  
at  
all.  
Generally  
hardware-based  
modems  
are  
several  
orders  
of  
magnitude  
more  
expensive  
than  
their  
software-based  
counterparts,

100x  
more  
expensive????????

Why do I  
get the  
impression  
that if I say,  
"what do  
you mean  
by that?"  
I will get a  
lesson in  
what  
"several  
orders of  
magnitude"  
/actually/  
means...

My  
meaning  
was clear.  
Don't be  
petulant.

Re: [OT] Vituperation(s) [WAS] Re: Etch + USB Modem -- Supported?

Petulant? Hah!

\*THIS\* is petulant:

well, now you're just being pedantic... ;)

I'll stop now.

No! We must go on and on and on, in an ever spiral descent into anger, vituperations and hostility!

Yes, let's do that! You should have written "ever spiralling descent", you illiterate atheist!

aw crap. Andreas and I were just discussing how the OT had really gone down and now this. I demand that we stop this OT crap now! Can't you people go somewhere else?

Well, if you're going to be like that, I demand to be taken off your list! How do I get off this list? Unsubscribe me immediately or I'll file a complaint with every TLA I can think of, ending with the International Court of Justice!

[Note: Ron would probably be insulted if I condescended to him by including a smiley on that, but for those who haven't been on the list for a sufficiently long time, that's a joke.]

leaving this intact as its still applicable.

and I really really am done, JFTR.

Duly noted and logged.

A

Celejar
