Hello,

I assume if I get the following messages:  
lo no wireless extensions.

eth1 no wireless extensions.

eth0 no wireless extensions.

sit0 no wireless extensions.

I do not have wireless extentions. Where can I obtain these?

Thanks,

No, it may only means that you don't have the driver for the card. I guess your card is a PCI card, so do, as root:

```
update-pciids
```

and then:

```
lspci
```

and give us the output of that last command.

Thierry
