sda1 and it booted all the way to login prompt and I am stuck. There is no other partition which I've made like /usr, /home, /var, etc. So I have no way of editing my /etc/mount since there isn't such file nor is there an editor i can use.

```
mount -o remount,rw /
cp -pai /etc/fstab /etc/fstab.SAVED
sed "s+^/dev/hda+/dev/sda+"</etc/fstab.SAVED>/etc/fstab
mount -a
```

Chi usa software non libero avvelena anche te. Digli di smettere.
Informatica=arsenico: minime dosi in rari casi patologici, altrimenti letale.
Informatica=bomba: intelligente solo per gli stupidi che ci credono.
