Hi,

I just upgraded my whole system from RH9->FC1. I notice that Mozilla crashes on entering some websites:

e.g website [www.rasterman.com](http://www.rasterman.com)

I can't enter at all on this website. when I type the url in, as soon as it loads the website mozilla crashes w/ no error messages at all.

My system have the following installed:

```
mozilla-devel-1.4.1-18
mozilla-nspr-devel-1.4.1-18
mozilla-nss-1.4.1-18
mozilla-dom-inspector-1.4.1-18
mozilla-1.4.1-18
mozilla-nss-devel-1.4.1-18
mozilla-js-debugger-1.4.1-18
mozilla-nspr-1.4.1-18
```

I have wiped out my ~/.netscape ~/.netscape6 and ~/.mozilla but w/o any luck. It still displays the same behavior. I also disabled java/javascript but in vain also.

Any clues/ideas in what might cause this? Thanks a lot for any help.

With kind regards,

Didier.
