Google Images returns this as the first hit:

http://www.shspvr.com/images_other/pvr350.jpg

The PVR-350 appears to be exactly the same size as the standard WinTV card. That's a shame if it won't fit into the Pundit case. That probably means it won't fit into any of the component-sized cases.

The cheap ATI TV Wonder cards are about half as wide. However, the ATI cards have terrible TV tuners and no radio tuner.
