-----BEGIN PGP SIGNED MESSAGE-----

Hash: SHA1

REcently I get the following from spamassassin when I try to run it:

<snip>-----

```
# /etc/init.d/spamassassin start
```

```
Starting spamd: Can't locate HTML/Parser.pm in @INC (@INC
contains: ../lib /usr/

```

Fedora: spamassassin fails to load

BEGIN failed--compilation aborted at /usr/bin/spamd line 33.

</snip>

I tried purging and reinstalling from the binary RPM.

Any clues? Neither APT nor Yum did complain about failing deps.

Regards
