Hi,

I have recently switched from Suse. In suse, by changing `/etc/sysconfig/snort`, we can activate snort dynamically when dialup connection is established.

These are the values.

`SNORT_INTERFACE=ppp0`

`SNORT_ACTIVATE=yes`

`SNORT_AUTO=yes`

In snort of fedora, these values are not present and even if we add these, snort does work. Any work around? Or am I missing something?

Regards,

Rajesh
