Hi,

I just upgraded from test1 to test2.

One thing I noticed is that font rendering seems to have changed in xterm, xemacs (apps that use traditional fonts). I run xterm with 'courier new' and the font looks awful after the upgrade. No config differences that I know of.

Do you know what's going on?

xterm command:

```
xterm +sb -fn *-courier new-medium-r-*-*-*_140-*-*-*_*_iso8859-*
```

thanks,

Raghu.

Do you Yahoo!?
