I'm using Azureus both on Linux and Win. I wouldn't call it light-weight exactly. it takes a huge footprint in terms of memory..

Running top

I see

SIZE = 224M

RSS = 30M

SHARE = 49844

%MEM = 6.1 % (of my 512MB RAM)

SO.. at 30MB, it's not exactly lightweight. I see about the same memory usage in Windows too.

But hey, I like azureus.
