Hello,

I installed firefox from the DAG repo and I use the bookmark FTP plugins to download and upload my bookmarks on my ftp when I open or close firefox.

But I have now as soon that I open a new firefox windows, its downloads the bookmarks even if there is only a windows open. And the same when I close a windows it reupload the bookmark even if there is still a window open... It causes problems , in fact I already lose 2 new bookmarks with this problem...

Anyone else experiencing this problem??

Thxs in advance

Ludo
