Hi all,

I am using FC2. I have a graphical login set up and so I can choose the environment language from the login screen by clicking on the Language tab at the bottom left.

By language for environment I mean that I get the desktop icons and the panel all in my selected language.

My query is, how to choose language if login is set for init 3. I mean, how would I choose a language for my session if I don't have a graphical login screen.
