Hello all,

I use mpg123 as a morning alarm. I place the job using the "at" command. I'm always getting output from the job (the mpg123 output bla bla) to my regular user mail. Fine..I just redirected stdout and stderr:

```
/usr/local/bin/mpg123 $HOME/musicfile.mp3 > /dev/null 2>&1
```

However, I still get mail saying "Job XXX Terminated..." I read the man page and searched Google but there's nothing out there. Anyone knows how to deal with it?

Thanks,  
JOrge
