To: For users of Fedora Core releases <fedora-list@redhat.com>

1. the CD rom iis an IDE unit
2. It is on the secondary IDE controller
3. It is on an IDE controller
4. The only thing I have you could call self booting is a game. If I have anything else I don't know what it is.
5. I tried it with my beer stein but it kept breaking the holder off so I stopped using it. However the CD has some age on it. Not sure about the speed but is not real fast.
